A tactical strategy for opportunistic investors that have a long-term mindset and are seeking an absolute return strategy.

The Opportunity Strategy offers investors a minimal constraint investment vehicle designed to seek out and identify companies leading positive disruptive change and are positioned to capture market share in new and/or existing industries.

Details and potential benefits of this strategy:

- Slowing Growth Environment
- Compressed Company Valuations
- Peaking Interest Rate Environment
- Improving Inflationary Pressures

Measures of volatility and time horizon:

Beta is a measure of the systematic risk of a security or portfolio compared to the market as a whole. Standard Deviation is the rate of return on an investment portfolio and is used to measure the inherent volatility of an investment. An investment time horizon is the time period where one expects to hold an investment for a specific goal.

- 3-Year Portfolio Beta: 1.54 as of 12-31-2022
- 3-Year Standard Deviation: 37.41 as of 12-31-2022
- Time Horizon: 4+ Years

The holdings above are as of January 3, 2023 and are subject to change. A current list of all securities held by LPAM strategies is available upon request.

Seek a balanced approach.

The Tactical Opportunity Strategy is an absolute return investment discipline that combines asset allocation with sector and stock selection to target above-average market returns throughout all points of the business cycle.
